

## Job Description – Project Engineer based in Skippack, PA, USA

### Introduction

SchuF Fetterolf is a world leading provider of valves and valve solutions to the Chemical, Refining, Pharmaceutical, Plastics and Polymers, Mining, Aluminium, and Power industries.

Headquartered in Eppstein, Germany, the SchuF Group has design and manufacturing subsidiaries in Brasil, Germany, India, Ireland and the United States. It's network of sales offices and agents can be found in most major cities across the globe.

A key element of SchuF's Global success has been our ability to attract the best engineers in industry for our Design, Project and Sales groups. Employees at SchuF work in a challenging yet relaxed, and multi-cultural environment. The advertised position is based in Skippack, PA at our Fetterolf Corporation subsidiary.

### Job Description – Key Activities

- Work closely with the design and manufacturing departments in order to propose a valve type or solution for customers
- Preparation of quotations in response to agent and end customer enquiries
- Pricing and costing calculations
- Produce project plans (e.g. MS project) for complex valve solutions
- Track open quotations and update sales managers and internal systems
- Manage order acceptance and implementation with the design office, purchasing, manufacturing and external suppliers
- Manage the necessary documentation in a professional way
- Ensure on time delivery of valves and solutions
- Carry out post project cost and profitability analysis

### Position requirements

- Technical qualification in Mechanical Engineering or valve engineering experience
- Project management qualification (e.g. Certificate in project management) or similar would be highly regarded
- Experience with project planning software (e.g. MS project or similar) would be advantageous
- German or other language abilities are welcome
- Work experience in a valve or similar company is beneficial but not essential

### **Personal Characteristics**

- Person who works well in a team and enjoys a collegial atmosphere
- Creative and not afraid to share your ideas
- Willingness to learn
- Detail oriented

If you feel that you match the above listed requirements, and would like a secure and rewarding career with a stable yet growing company please forward you career details to us either by e-mail, fax or post.
